

SIMON FRASER UNIVERSITY

Course Change Form

November 1, 2007

Existing Course Number/Title: ENSC 328-1 Random Processes in Engineering

Please check appropriate revision(s) being recommended:

Course Number: _____ Credit Hour: _____ Title: _____

Description: _____ Prerequisite: X Vector: _____

State # of hours for:

Lect. () Sem () Tut () Lab ()

FROM:

Prerequisite: ENSC 380 and STAT 270. Students who have taken ENSC 327 may not take ENSC 328 for further credit.

TO:

Prerequisite: ENSC 380 and STAT 270. STAT 270 may be taken concurrently. Students who have taken ENSC 327 may not take ENSC 328-1 for further credit.

RATIONALE:

Students in ENSC 328 only need to take the lectures of ENSC 327 from Week 7 to Week 9. Most of the probability theory knowledge required by ENSC 328 is covered in the first half of STAT 270 (the second half of STAT 270 is on hypothesis testing). Students who are taking ENSC 328 and STAT 270 simultaneously in fall 2007 have no difficulty in catching up with ENSC 328. Therefore taking STAT 270 concurrently is acceptable.

Effective date: 08-09 Calendar
